

This test makes sure that the logical OR binary operator can be nested within itself. Note that boolean values can not be cast to strings so this test first implicitly casts the resulting boolean values to integer values and prints these out instead.

HAI

```
VISIBLE SUM OF 0 AND EITHER OF WIN AND EITHER OF WIN AND WIN MKAY?  
VISIBLE SUM OF 0 AND EITHER OF WIN AND EITHER OF WIN AND FAIL MKAY?  
VISIBLE SUM OF 0 AND EITHER OF FAIL AND EITHER OF WIN AND WIN MKAY?  
VISIBLE SUM OF 0 AND EITHER OF FAIL AND EITHER OF WIN AND FAIL MKAY?
```

KTHXBAI

Output:

```
1  
1  
1  
1
```
