

This test makes sure that the unary NOT operator can be nested within itself. Note that boolean values can not be cast to strings so this test first implicitly casts the resulting boolean values to integer values and prints these out instead.

HAI

VISIBLE SUM OF 0 AN EITHER OF WIN AN NOT NOT WIN MKAY?
VISIBLE SUM OF 0 AN EITHER OF WIN AN NOT NOT FAIL MKAY?
VISIBLE SUM OF 0 AN EITHER OF FAIL AN NOT NOT WIN MKAY?
VISIBLE SUM OF 0 AN EITHER OF FAIL AN NOT NOT FAIL MKAY?

KTHXBAI

Output:

1
1
1
