

This test makes sure that the logical AND binary operator can be nested within itself. Note that boolean values can not be cast to strings so this test first implicitly casts the resulting boolean values to integer values and prints these out instead.

HAI

VISIBLE SUM OF 0 AND BOTH OF WIN AND BOTH OF WIN AND WIN MKAY?
VISIBLE SUM OF 0 AND BOTH OF WIN AND BOTH OF WIN AND FAIL MKAY?
VISIBLE SUM OF 0 AND BOTH OF FAIL AND BOTH OF WIN AND WIN MKAY?
VISIBLE SUM OF 0 AND BOTH OF FAIL AND BOTH OF WIN AND FAIL MKAY?

KTHXBAI

Output:

1
0
0
0
